Hello Peter:

My oh my how excited Katie was when she got off of that airplane about her week spent at the Beginnings Workshop. Katie just loved everything about it, she keeps telling us all the great things she learned about acting, coaching, voice overs, etc... She even loved the food. Katie seemed to absorbed everything she went through. Katie has been telling me about good food for us to eat and drink (she is trying to get me off of my morning coffee). She is working her cell phone differently now that she has been told they are the next cigarettes, which I totally agree with.. all these people getting brain cancer. She gets so excited when she talks about the VIP seminars and the lectures every day.

Oh and she just loved the 40's swing dance. She has shown me all of her new dances she has learned and kept singing all day yesterday showing us how she has improved. We went over the activity of her voice overs and that was a hoot to see her excited. We missed her but knew that she was in good hands.

Both Bill and I appreciate this opportunity that Katie had to grow and have fun and learn so much in one week. She was so well taken care of while she was there. Katie told us it was way better than she ever could have thought. Thank you very much... We are looking forward to her opportunity to attend London and look forward to hearing more about that upcoming trip.

Katie also mentioned that I should be calling you... When would you like me to do that?

Take care and thank you again very much!

Karen and Bill Howe
