Well its been years that we have talked and you have come a long way from your first outlook on the world of technology. I am impressed! From someone who never wanted to use the computer to wow!

You popped into my head the other night in a dream. Go figure. So I thought I would sent you a note and let you know, you did have a big impact on the lives of the Choyces from when we first met you to even now.

Life has been good to you it seems as well as being good to me. Lauralee is happily married and living in DE while her husband pursues his masters in culinary. She has turned into a beautiful young woman. Melissa is in her sophomore year at Smith and is majoring in Government and Asian studies. She is intelligent and gaining confidence in who she is everyday. Matt is well adjusted to life and has come a long way from the terror he once was. He has manners and is happy with life. I guess that's because I have also grown to help him adjust.

If you ever have the need for a nurse at any of your workshops, keep me in mind. As I still am a great nurse and also have the ability to make my own schedule, as I own my own company now. Its always a great thing to be able to help those who have helped me. You have not only helped me, but have helped 3 out of my 4 children. Something not many have done.

I wish you all the best for a happy, wonderful 2008 with all good things Peter.

Be well,
Lori L. Choyce, RN
