to me

Hello Peter!

Well, [redacted] survived her first newly tweaked Beginnings Workshop! I have been meaning to write you and let you know how pleased I was with the in-home workshop. Although it saddens me that I can't ship her to you for 7 days and allow her to experience your Academy like I did years ago, I'm grateful that you are still doing this wonderful program that my daughter can attend.

Please let me know if there is anything she needs to really work on. (Besides reading everything- hahaha) I try, just like my grandparents did, to tell her different things, but coming from a parent versus coming from someone respected in the business, might allow her to see what she struggles or needs work on, and really understand any positive criticism/feedback.

I look forward to viewing your insightful and helpful videos that you share on social media, which you have not done in a while, so hop to it because you're slacking!! Lol.

Don't work too hard this weekend.

Talk with you soon.
Brandy
